

Artificial Intelligence - Internship

Netherlands based – October 2022

Role Description:

We're looking for someone who wants to test their knowledge in an active startup environment. We're accepting students with interests in Machine Learning engineering, Federated Learning, Distributed Optimisation, and/or model building/analysis. We hope to offer you an environment to get hands on with developing tangible machine learning systems.

We're open for students looking to complete a thesis in a Computer Science or Artificial Intelligence domain. Or looking for a semester internship.

About BranchKey:

BranchKey is a Platform-as-a-service (PaaS) company. We build and provide the platform to enable massively collaborative federated machine learning. Only through communication and distribution does the real value of machine learning become realised. Our company works to realise this goal by building a distribution platform for machine learning agents. We believe that accelerating machine learning deployment in industries such as healthcare, energy, agriculture, and financial services can quickly solve low-hanging problems, improving society, and lifting the bar for people to do more intrinsically rewarding work.

BranchKey is a **fully remote company**. This requires a decentralised working pattern and individual autonomy. If remote and autonomous work doesn't suit your style, this role may not suit you.

What to expect from us:

- Autonomy in your role – decentralised responsibility and no micromanagement
- Freedom to improve/rebuild the BD structure
- Support in achieving your internship goals
- Experience of early-stage startup development- develop your own way of working
- Minimal time from onboarding to action
- Fast development cycles, minimise the paperwork and bureaucracy
- Young and ambitious team members who believe in making good products
- 4-day work week + Personal Learning Day to expand beyond normal role
- Flexible working hours
- A salary to support yourself

Skills/Experience:

- English professional level
- Excellent verbal and written communications skills
- Strong presentation and communication skills

Education and/or Experience:

- Currently studying a Artificial Intelligence or related degree
